#### **CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES**

## Amendments to IAS 1 Presentation of Financial Statements

In January 2020, the IASB issued amendments to IAS 1 *Presentation of Financial Statements* ("IAS 1"), to clarify its requirements for the presentation of liabilities as current or non-current in the statement of financial position. These amendments are effective for periods beginning on or after January 1, 2024. The Company adopted the amendments to IAS 1, along with any consequential amendments. These changes did not have a material impact on the financial statements.

In October 2022, the IASB issued amendments to IAS 1, which specify the classification and disclosure of a liability with covenants. These amendments are effective for periods beginning on or after January 1, 2024. The Company adopted the amendments to IAS 1, along with any consequential amendments. These changes did not have a material impact on the financial statements.

In April 2024, the International Accounting Standards Board issued IFRS 18 Presentation and Disclosure in Financial Statements ("IFRS 18") to replace IAS 1. IFRS 18 sets out requirements for the presentation and disclosure of information in the financial statements including a new structure for the Statement of Profit and Loss, disclosure of Management-defined performance measures and enhanced principles on aggregation and disaggregation. In addition, interest paid will be classified under financing activities on the Statement of Cash Flows which could result in a material change under IFRS 18. This standard is effective for annual reporting periods beginning on or after January 1, 2027, including for interim financial statements. The Company is still assessing the full impact of this amendment.

As at June 30, 2024, the Company had total available bank credit facilities of \$55.0 million, comprised of a \$48.0 million credit facility and a \$7.0 million operating loan. The credit facility is a committed 364 days + 1 year and extendible upon agreement annually; and amounts outstanding are shown as long term debt on the Company's balance sheet. The operating loan is shown as a current liability. The credit facility and operating loan incur interest based on the applicable Canadian prime rate or Canadian Overnight Repo Rate Average ("CORRA") plus between 2.25% and 5.25% depending on the type of borrowing and the Company's debt to EBITDA ratio. The Company is also subject to a standby fee of 0.8125% to 1.3125% based on the Company's debt to EBITDA ratio. As at June 30, 2024, the Company is in compliance with all covenants. The next review date is November 30, 2024.

#### 12. DECOMMISSIONING LIABILITY

At the end of the operating life of the Company's facilities and properties and upon retirement of its oil and natural gas assets, decommissioning costs will be incurred by the Company to abandon and reclaim the wells and facilities. Estimates of these costs are subject to uncertainty associated with the method, timing and extent of future decommissioning activities and the discount rate applied in measuring the liability. The liability, the related asset and the expense are impacted by estimates with respect to the costs and timing of decommissioning.

The Company estimates its total undiscounted amount of cash flows required to settle its decommissioning liability at approximately \$192.4 million (\$111.8 million undiscounted, uninflated) (December 31, 2023 - \$189.6 million and \$110.6 million respectively), which will be incurred over the remaining life of the assets between 2024 and 2065. The estimated future cash flows have been discounted using a credit adjusted rate of 12% (December 31, 2023 – 12%) and an inflation rate of 2% (December 31, 2023 – 2%). The change in estimate for the year ended December 31, 2023 relates to an increase in costs of abandonment for 2025, and acceleration of abandonment timing.

The following table shows changes in the decommissioning liability:

#### a) Stock Options

Effective June 15, 2016, the Company adopted a new stock option plan under which officers, management, employees, directors and consultants of the Company are eligible to receive grants. Under the stock option plan, which was approved by the Board of Directors, the granted stock options vest to the grantee over a three-year period. The grantee has the right to exercise the stock options for a maximum of up to nine years from the date of the grant and the stock options terminate 30 days following the termination of the grantee's employment. All stock options vest and may be exercisable in the event of a change of control or initial public offering. The maximum number of outstanding stock options under the plan is limited to 10% of the common shares outstanding. Stock option grants and the stock option exercise price are set by the Board of Directors at the time of grant.

Share-based compensation expense related to stock options during the three and six months ended June 30, 2024 was \$56,000 and \$119,000 (three and six months ended June 30, 2023 - \$87,000 and \$188,000).

The following table sets forth a reconciliation of the stock option plan activity from December 31, 2022 through to June 30, 2024:

Wtd. Avg.

Exercise Price (\$)

	Number	(1)
BALANCE AT DECEMBER 31, 2022	13,952,760	1.32
Granted	100,000	2.35
Forfeited	(170,000)	1.74
BALANCE AT DECEMBER 31, 2023	13,882,760	1.32
Exercised	(400,000)	0.37
BALANCE AT JUNE 30, 2024	13,482,760	1.35

<sup>(1)</sup> Weighted average exercise prices have been adjusted \$0.35 and \$0.15 per stock option due to the return of capital distribution paid on July 29, 2022 and December 15, 2023, respectively.

There were no stock options issued and 400,000 stock options were exercised during the six months ended June 30, 2024. As at June 30, 2024 there were 13,184,422 options vested and exercisable and there were 13,517,755 options vested and exercisable as at December 31, 2023. There were no stock options exercised during the year ended December 31, 2023.

The range of exercise prices of the outstanding stock options and weighted average contractual life remaining as at June 30, 2024 were as follows:

	Wtd. Avg.	Number of	Number of
	Contractual Life	options	options
Exercise Price Range (1)	Remaining	outstanding	exercisable
\$0.35	0.96	1,961,976	1,961,976
\$0.36 - \$1.49	1.05	1,626,357	1,626,357
\$1.50 - \$2.94	2.97	9,894,427	9,596,089
	2.44	13.482.760	13.184.422

<sup>(1)</sup> Weighted average exercise prices have been adjusted \$0.35 and \$0.15 per stock option due to the return of capital distribution paid on July 29, 2022 and December 15, 2023, respectively.

The fair value of each option granted, modified or acquired is estimated on the date of grant or acquisition using the Black-Scholes option pricing model with the following weighted average assumptions:

	For the year ended
	Dec. 31, 2023
Weighted average fair value of options granted	1.37
Risk-free Interest rate (%)	3.38%
Expected life (years)	5.0
Estimated volatility of underlying common shares (%)	60%
Weighted average grant date share price	2.50
Forfeiture rate	3%
Expected dividend yield (%)	-

The expected volatility of the options granted is based on the historical volatility of publicly traded peer companies that in management's judgement have similar characteristics to the Company and are therefore a good indicator of the expected volatility of the Company.

#### b) Performance Warrants

There were no performance warrants issued by the Board of Directors during the six months ended June 30, 2024 (year ended December 31, 2023 – nil).

The performance warrant entitles the holder to purchase one common share of the Company and were originally granted with the following vesting dates and exercise prices:

	2016 Issuance	2017 Issuance
Warrants granted	16,125,000	17,937,500

First anniversary	\$1.70	\$3.40
Second anniversary	\$1.90	\$3.80
Third anniversary	\$2.10	\$4.20
Fourth anniversary	\$2.30	\$4.60

The right to exercise the performance warrants is subject to a performance event taking place which includes the occurrence of any of the following (i) the Company raising a minimum of \$25.0 million through a private placement, excluding the securities issued as part of the recapitalization that occurred in June 2016 (ii) the occurrence of an initial public offering on a recognized Canadian or U.S. stock exchange, or (iii) a change of control. Only vested performance warrants based on the schedule above will become exercisable if the Company achieves performance event (i). In the event of performance event (ii) and (iii), all performance warrants outstanding which have not vested or become exercisable in accordance with their terms shall vest and become exercisable immediately. On November 6, 2019, an extension of two years to the expiry date (from five years to seven years) for performance warrants was approved by the Board of Directors. On November 25, 2022, an extension of two years to the expiry (from seven years to nine years) for performance warrants outstanding was approved by the Board of Directors.

Share-based compensation expense related to performance warrants during the three and six months ended June 30, 2024 was \$508,000 and \$1.0 million (three and six months ended June 30, 2023 - \$497,000 and \$1.0 million).

#### 16. FINANCIAL INSTRUMENTS

The Company has exposure to credit, liquidity, interest, and foreign currency risk from its use of financial instruments. Further qualitative disclosures are included throughout these financial statements.

The Board of Directors has overall responsibility for identifying the principal risks of the Company and ensuring the policies and procedures are in place to appropriately manage these risks. Karve's management identifies, analyzes and monitors risks and considers the implication of the market condition in relation to the Company's activities.

#### a) Fair Value of Financial Instruments

Financial instruments are comprised of cash and cash equivalents, trade and other receivables, deposits, derivative assets (liabilities), trade and other payables, operating loan, and long term debt.

There are three levels of fair value by which a financial instrument can be classified:

Level 1 - Quoted prices in active markets for identical assets and liabilities such as traded securities on a registered exchange where there are a sufficient frequency and volume of transactions to provide ongoing pricing information.

Level 2 - Inputs other than quoted prices that are observable for the asset and liability either directly and indirectly such as quoted forward prices for commodities, foreign exchange contracts, time value and volatility factors which can be substantially observed or corroborated in the marketplace; and

Level 3 - Inputs that are not based on observable market data.

The fair values of the derivative contracts and foreign exchange contracts used for risk management are measured using level 2 observable inputs. This includes quoted prices received from financial institutions based on published forward price curves as at the measurement date, (using the remaining contracted oil and natural gas volumes) and forward exchange rates, respectively.

The fair value of cash and cash equivalents, trade and other receivables, deposits, and trade and other payables approximate their carrying amounts due to their short-term maturities. The fair value of the amounts drawn on the operating loan and long term debt is equal to its carrying amount as the facilities bear interest at floating rates and credit spreads that are indicative of market rates.

The following table summarizes Karve's financial instruments at June 30, 2024:

	Amortized	Total fair

#### b) Risk Associated with Financial Assets and Liabilities

#### Market Risk

Market risk is the risk that changes in market prices, such as commodity prices, foreign exchange rates, and interest rates will affect the Company's net income or the value of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable limits, while maximizing returns. The Company utilizes financial derivative contracts to manage certain market risks. All such transactions are conducted in accordance with the risk management policy that has been approved by the Board of Directors.

The components of the (loss) gain on financial derivative contracts is as follows:

	For the three months ended		For the si	x months ended
(\$000s)	June 30, 2024	June 30, 2023	June 30, 2024	June 30, 2023
Unrealized gain (loss) on financial derivative contracts	142	220	(86)	705
Realized (loss) gain on financial derivative contracts	(182)	41	(182)	(290)
(LOSS) GAIN ON FINANCIAL DERIVATIVE CONTRACTS	(40)	261	(268)	415

## i) Commodity Price Risk

Due to the volatile nature of natural gas and oil commodity prices, the Company is exposed to adverse consequences if commodity prices decline. The Company is exposed to commodity price movements as part of its operations, particularly in relation to the prices received for its oil and gas production. Oil and gas is sensitive to numerous worldwide factors, many of which are beyond the Company's control. Changes in global supply and demand fundamentals in the oil and gas market and geopolitical events can significantly affect oil and gas prices. These factors could be impacted by the rate at which global energy markets transition to lower carbon-based economies. Consequently, these changes could also affect the value of the Company's properties, the level of spending for exploration and development and the ability to meet obligations as they come due. The Company's oil production is sold under short-term contracts, exposing it to the risk of near-term price movements depending on marketing conditions. It is the Company's policy to hedge a portion of its crude oil sales using financial derivative contracts. The Company does not apply hedge accounting to these contracts.

At June 30, 2024, the Company had the following commodity contracts in place:

			Volume	Put Price	Call Price	Current Liability
Туре	Term	Basis <sup>(1)</sup>	(Bbl/d)	(\$CAD/BbI) <sup>(1)</sup>	(\$CAD/BbI) <sup>(1)</sup>	(\$000s)
Collar	Oct. 1/24 - Dec. 31/24	WTI	500	95.00	120.00	31

<sup>(1 )</sup> Nymex WTI monthly average in  $\mbox{\ensuremath{\mathsf{CAD}}}.$ 

At June 30, 2024, the fair value of the commodity derivative contracts outstanding was in a current liability position of \$31,000 resulting in an unrealized loss of \$31,000 (December 31, 2023 - \$nil current liability). The fair value, or mark-to-market value, of these contracts are based on the estimated amount that would have been received or paid to settle the contracts as at June 30, 2024 and may be different from what will eventually be realized. At June 30, 2024, the Company realized a loss of \$182,000 on a commodity derivative contract that ended on June 30, 2024.

At June 30, 2023, the Company recorded an unrealized gain of \$204,000 and a realized loss of \$331,000.

## ii) Foreign Exchange Risk

The Company is exposed to the risk of changes in the U.S./Canadian dollar exchange rate ("USD/CAD") on crude oil sales based on U.S. dollar benchmark prices. Foreign exchange risk is mitigated by entering into foreign exchange contracts.

At June 30, 2024, the Company had the following foreign exchange contracts in place:

		Monthly		Curi	rent Liability
Туре	Term	Notional Amt.	Floor	Ceiling	(\$000s)
Average rate collar	Apr. 1/24 - Dec. 31/24	US \$1.75 million	1.3300	1.3800	47
Average rate collar	Apr. 1/24 - Dec. 31/24	US \$1.75 million	1.3400	1.3900	8

At June 30, 2024, the fair value of the foreign exchange contracts were in a current liability position of \$55,000 resulting in an unrealized loss of \$55,000 for the six months ended June 30, 2024. The fair value, or mark-to-market value, of these contracts are based on the estimated amount that would have been received or paid to settle the contracts as at June 30, 2024 and may be different from what will eventually be realized. During the six months ended June 30, 2024, the Company realized a loss of \$nil on the foreign exchange contract.

At June 30, 2023, the Company recorded an unrealized gain of \$501,000 on a foreign exchange contract and a realized gain of \$41,000.

#### iii) Interest Rate Risk

The Company is exposed to interest rate risk to the extent that bank debt is at a floating or short-term rate of interest in relation to interest expense on its long term debt and operating loan facility. The credit facility and operating line incur interest based on the applicable Canadian prime rate or Canadian Overnight Repo Rate Average ("CORRA") plus between 2.25% and 5.25% depending on the type of borrowing and the Company's debt to EBITDA ratio and is subject to an annual standby fee on the undrawn portion. As at June 30, 2024, \$13.0 million (December 31, 2023 - \$15.0 million) was drawn on the credit facility (\$12.8 million – net of amortized debt issue costs). Currently the Company has not entered into any agreements to manage this risk. An increase (decrease) in the interest rate by 1% would result in an increase (decrease) to net income before tax of \$117,000 for the six months ended June 30, 2024 (six months ended June 30, 2023 - \$132,000).

#### iv) Liquidity Risk

The Company's approach to managing liquidity risk is to have sufficient cash and/or credit facilities to meet its obligations when due. Management typically forecasts cash flows for a period of 12 months to identify any financing requirements. Liquidity is managed through daily and longer-term cash, debt, and equity management strategies. These include estimating future cash generated from operations based on reasonable production and pricing assumptions, estimating future discretionary and non-discretionary capital expenditures and assessing the amount of equity or debt financing available.

A contractual maturity analysis for the Company's financial liabilities as at June 30, 2024 is as follows:

(\$000s)	Within 1 year	1 to 5 years	Total
Operating loan	5,999	-	5,999
Trade and other payables	25,003	-	25,003
Derivative liability	86	-	86
Lease liabilities	393	1,411	1,804
Long term debt	-	12,791	12,791
TOTAL	31,481	14,202	45,683

A contractual maturity analysis for the Company's financial liabilities as at December 31, 2023 is as follows:

(\$000s)	Within 1 year	1 to 5 years	Total
Operating loan	2,303	-	2,303
Trade and other payables	22,625	-	22,625
Lease liabilities	390	1,593	1,983
Long term debt	-	14,843	14,843
TOTAL	25,318	16,436	41,754

#### 17. CAPITAL MANAGEMENT

## a) Capital Base

In order to continue the Company's future exploration and development program, the Company must maintain a strong capital base to enable access to equity and debt markets. The Company continually monitors the risk/reward profile of its exploration and development projects and the economic indicators in the market including commodity prices, interest rates and foreign exchange rates. After considering these factors, revisions to the Company's capital budget are made upon the approval of the Board of Directors.

The Company considers shareholders' capital and net debt as components of its capital base. Net debt is defined as long term debt plus any net working capital excluding derivative contract asset/liability and current portion of decommissioning liability. The Company can access or increase capital through the issuance of shares, through bank borrowings (based on reserves) and by building cash reserves by reducing its capital expenditure program.

The following table represents the net capital of the Company:

Long term debt	(5,999) (12,791)	(14,843)
Trade and other payables  Operating loan	(25,003) (5,999)	(22,625) (2,303)
Total current assets	27,730	23,003
Shareholders' Equity	383,945	368,223
(\$000s)	June 30, 2024	Dec. 31, 2023
	As at	

The Company monitors its capital based primarily on its net debt to annualized funds flow ratio. Net debt is defined as long term debt plus any net working capital deficiency excluding derivative contract asset/liability, current portion of decommissioning liability, and current portion of lease liability. Annualized funds flow is calculated as cash flow from operations before changes in non-cash working capital for the Company's most recent quarter, multiplied by four. To facilitate the management and control of its capital base, the Company prepares annual operating and capital expenditure budgets. The budgets are updated when critical factors change. These include economic factors such as the state of equity markets, changes to commodity prices, interest rates, foreign exchange rates and Company specific factors or assumptions such as the Company's drilling results and its production profile. The Company's Board of Directors approves the budget and changes thereto. At June 30, 2024, the Company had net debt of \$16.1 million (December 31, 2023 – \$16.8 million).

The Company's share capital is not subject to external restrictions, but the Company does have key covenants of its credit facilities that include standard business operating covenants. As at June 30, 2024, the Company is in compliance with all covenants and management expects to comply with all terms during the subsequent 12-month period.

#### 18. COMMITMENTS

During the six months ended June 30, 2024, the Company entered into a farm-in agreement with a third party where Karve is committed to drilling three multilateral test wells in the Cold Lake area with an estimated cost of \$4.5 million by December 31, 2024. Karve will earn a 50% working interest in the 6.5 sections of the farm-in lands upon completion of the commitment.
